LAW ESTABLISHING THE CHILDREN'S BUREAU.

AN ACT To establish in the Department of Commerce and Labor a bureau to be known as the Children's Bureau.

[62d Cong., 2d session. S. 252. Public, No. 116.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be established in the Department of Commerce and Labor a bureau to be known as the Children's Bureau.¹

SEC. 2. That the said bureau shall be under the direction of a chief, to be appointed by the President, by and with the advice and consent of the Senate, and who shall receive an annual compensation of five thousand dollars. The said bureau shall investigate and report to said department upon all matters pertaining to the welfare of children and child life among all classes of our people, and shall especially investigate the questions of infant mortality, the birth rate, orphanage, juvenile courts, desertion, dangerous occupations, accidents and diseases of children, employment, legislation affecting children in the several States and Territories. But no official, or agent, or representative of said bureau shall, over the objection of the head of the family, enter any house used exclusively as a family residence. The chief of said bureau may from time to time publish the results of these investigations in such manner and to such extent as may be prescribed by the Secretary of Commerce and Labor.

SEC. 3. That there shall be in said bureau, until otherwise provided for by law, an assistant chief, to be appointed by the Secretary of Commerce and Labor, who shall receive an annual compensation of two thousand four hundred dollars; one private secretary to the chief of the bureau, who shall receive an annual compensation of one thousand five hundred dollars; one statistical expert, at two thousand dollars; two clerks of class four; two clerks of class three; one clerk of class two; one clerk of class one; one clerk, at one thousand dollars; one copyist, at nine hundred dollars; one special agent, at one thousand four hundred dollars; one special agent, at one thousand two hundred dollars, and one messenger at eight hundred and forty dollars.

SEC. 4. That the Secretary of Commerce and Labor is hereby directed to furnish sufficient quarters for the work of this bureau at an annual rental not to exceed two thousand dollars.

SEC. 5. That this Act shall take effect and be in force from and after its passage.

Approved, April 9, 1912.

¹Transferred from Department of Commerce and Labor to Department of Labor by Act approved March 4, 1913.

LETTER OF TRANSMITTAL.

U. S. DEPARTMENT OF LABOR,
CHILDREN'S BUREAU,
Washington, D. C., June 24, 1913.

SIR: I transmit herewith a statistical report showing the number of children in the United States according to the census of 1910, and their sex, age, race, nativity, parentage, and geographic distribution.

This constitutes Part 1 of a statistical handbook designed to bring together in a convenient form the available official statistics regarding children. We hope to follow this with other parts, as fast as they can be prepared with our limited force, relating to the proportion of children, the birth rate, and infant mortality, illiteracy and school attendance, child labor, and the defective, dependent, and delinquent children.

The preparation of these reports is under the immediate supervision of Mr. Lewis Meriam, the assistant chief of the Children's Bureau. He desires that special mention be made of the faithful service of Miss Lillian M. Lewis, who has prepared most of the tabular matter.

Very respectfully,

JULIA C. LATHROP,
Chief of Bureau.

Hon. WILLIAM B. WILSON,
Secretary of Labor.

HANDBOOK OF FEDERAL STATISTICS OF CHILDREN.

INTRODUCTION.

Several Government bureaus have in the past collected statistical material relating to children, but it is scattered through numerous volumes of official reports and has never been brought together and correlated by anyone interested primarily in its relation to the problems of child welfare. The object of this statistical handbook is to perform that task; to bring the material together, to digest, correlate, and annotate it, so that the user may have in convenient form a summary of the available data. The basic figures in this handbook are not new, but in most cases the arrangement and the derivative figures are.

SCOPE OF PART 1.

Part 1 of the handbook is concerned with the number of children, their age, sex, race, nativity, parentage, and geographic distribution. It is designed to answer the questions: "How many children of each class are there?" and "Where are they?"

The first question which arises in the compilation of such statistics is at what age shall the line be drawn between childhood and adult life. The age at which it is drawn in legislation affecting children differs for different purposes, and often differs for the same purpose in different States. For instance, a boy does not become an adult capable of binding himself by an ordinary contract until he is 21 years old, but he can generally marry at a considerably earlier age. The variation between the States in respect to the ages below which children are protected from the evils of child labor is notorious; and often, very reasonably, the child-labor laws of a State will prescribe different ages for different occupations or for different types of children. Thus, so far as the law is concerned, there is no clearly recognized dividing line between childhood and adult life.

The 1910 census returns thus far published do not show the number of persons at each individual year of age, but give the number in each five-year age period beginning with "under 5." The period of life from birth to the twentieth birthday is thus divided into four periods:

"Under 5 years," "5 to 9 years," "10 to 14 years," and "15 to 19 years." By adding the numbers in the first three of these periods together the total number of children under 15 years of age is secured; and the period of life from birth to the fifteenth birthday probably coincides as closely as any other with the popular conception of the years of childhood. In most of the general tables in this section of the handbook the number of children in the different quinquennial age periods under 20 are shown separately and in addition a total is presented for the children under 15.

Attention should perhaps be called to the fact that the number of children at any given year of age can be determined with a close approach to accuracy by dividing by five the total for the quinquennial period into which the given age falls. For example, in estimating the number of children 16 years of age the number in the quinquennial period 15 to 19 would be divided by 5. In a natural population—that is, in a population not influenced by immigration or emigration—this method tends to understate the number of children in the lower ages of the five-year period and to overstate the number in the higher ages, provided, of course, the population is not decreasing; but the percentage of error is so slight that it can generally be safely ignored, except in work demanding great refinement.¹ The error is,

¹ It is rather interesting to compare the results of this method of estimating, as applied to the four quinquennial periods of childhood, with the results of an enumeration by single year of age. This of course can not yet be done for 1910, but it is done for 1900 in the following table, which gives the percentage which the actual number enumerated as of the specified age forms of the estimated number:

AGE.	CHILDREN UNDER 20 YEARS OF AGE, CENSUS OF 1900.	
	Number.	Per cent which actual number in given age forms of num- ber computed on hypothesis of even distri- bution.
Under 5 years.....	9,189,448
Number in each year under 5 as computed on hypothesis that the num- ber at each age was the same.....	1,837,890
Actual number:		
Under 1 year.....	1,920,987	104.5
1 year.....	1,771,575	96.4
2 years.....	1,834,188	99.8
3 years.....	1,828,171	99.5
4 years.....	1,834,527	99.8
5 to 9 years.....	8,889,339
Number in each year from 5 to 9 as computed on hypothesis that the num- ber at each age was the same.....	1,777,868
Actual number:		
5 years.....	1,811,958	101.9
6 years.....	1,835,843	103.3
7 years.....	1,785,865	100.4
8 years.....	1,783,509	100.3
9 years.....	1,672,164	94.1
10 to 14 years.....	8,091,951

of course, greatest in estimating the number in the individual years under 5, because the mortality of children in the first year of life is so high that the number less than 1 year old is much greater than the number a year old. Fortunately, the number of children enumerated as under 1 year of age has been published by the Census Bureau for 1910, and it has been reproduced in these tables. A more accurate estimate of the number at the other ages under 5 can therefore be made by subtracting those under 1 from the total under 5 and dividing the difference by 4.

NUMBER OF CHILDREN.

On April 15, 1910, according to the Federal census, there were in the United States 40,417,361 persons under 21 years of age and they formed 43.9 per cent of the total population of the country. The distribution of this great body of minors according to their ages is presented in Table I, which shows the percentage which the children of the specified age form of the entire population of the United States.

(Footnote—Continued.)

AGE.	CHILDREN UNDER 20 YEARS OF AGE, CENSUS OF 1900.	
	Number.	Per cent which actual number in given age forms of number computed on hypothesis of even distribution.
Number in each year from 10 to 14 as computed on hypothesis that the number at each age was the same.....	1,618,390
Actual number:		
10 years.....	1,743,383	107.7
11 years.....	1,585,080	97.9
12 years.....	1,640,005	101.3
13 years.....	1,552,537	95.9
14 years.....	1,570,946	97.1
15 to 19 years.....	7,577,324
Number in each year from 15 to 19 as computed on hypothesis that the number at each age was the same.....	1,515,465
Actual number:		
15 years.....	1,535,509	101.3
16 years.....	1,564,271	103.2
17 years.....	1,492,422	98.5
18 years.....	1,539,185	101.6
19 years.....	1,445,937	95.4

Figures for individual years of age, even as enumerated in a census, are not absolutely accurate. The facts regarding all the members of a family are often given the enumerator by the person who happens to be at home when he calls, and in making the statements as to age there is a tendency, clearly recognizable in the results, to give, in reporting the age of adults, an age ending in a five or a zero; and the figures above suggest that in reporting the age of children the general tendency is to prefer an age ending in an even number. Possibly these two tendencies combine at age 10, for at that age the relative difference between the number as enumerated and the number as estimated is greatest, the number enumerated being 107.7 per cent of the number estimated. In this case the number enumerated is probably an overstatement and the number estimated an understatement, the true number lying between. The other figures tend to show that the method of estimating gives results sufficiently reliable for rough work.

TABLE I

AGE.	CENSUS OF 1910.	
	Number of children of specified age.	Per cent which children of specified age form of the total population.
Under 21 years.....	40,417,361	43.9
Under 20 years.....	38,562,739	41.9
Under 15 years.....	29,499,136	32.1
Under 10 years.....	20,391,996	22.2
Under 5 years.....	10,631,364	11.6
Under 1 year.....	2,217,342	2.4
5 to 9 years.....	9,760,632	10.6
10 to 14 years.....	9,107,140	9.9
15 to 19 years.....	9,063,603	9.9
20 years.....	1,854,622	2.0

Persons under 15 years of age, the group which is generally thought of when children are mentioned, number 29,499,136 and form about one-third of the whole population. Babies under a year old number over 2,000,000 and make up almost one-fortieth of the people. It is generally believed that the census tends to understate the number of infants, possibly because some of them are omitted by the enumerators but more probably because mothers are likely to call their babies a year old when they are, in fact, only 10 or 11 months old. In the first case the babies do not appear in the census at all, and in the second case they appear as children 1 year old.

SEX.

The number of boys and girls is always very nearly equal, but the boys predominate slightly. The following table shows the number of boys and the number of girls at each age period and the number of boys to each 100 girls.

TABLE II

AGE.	CENSUS OF 1910.		
	Number of boys of specified age.	Number of girls of specified age.	Number of boys to each 100 girls.
Under 21 years.....	20,333,126	20,084,235	101.2
Under 20 years.....	19,433,754	19,128,985	101.6
Under 15 years.....	14,906,472	14,592,664	102.2
Under 10 years.....	10,304,719	10,087,277	102.2
Under 5 years.....	5,380,596	5,250,768	102.5
Under 1 year.....	1,123,409	1,093,933	102.7
5 to 9 years.....	4,924,123	4,836,509	101.8
10 to 14 years.....	4,601,753	4,505,387	102.1
15 to 19 years.....	4,527,282	4,536,321	99.8
20 years.....	899,372	955,250	94.2

Among the babies under 1 year of age there were, in 1910, 102.7 boys to each 100 girls, the boys outnumbering the girls by 29,476. Judging from the figures here given one would say that the excess of

boys disappears at the ages 15 to 19 but it is very doubtful whether this is a fact. Census age figures are very seriously affected by the women who understate their ages, and this understatement carries into the age period from 15 to 19 years many women who should be in the older age periods. Among men there is probably no corresponding tendency and hence in the age period 15 to 19 the women outnumber the men, though at all other quinquennial age periods below 75 years there are more men than women.

This understatement of age means that certain women, older than 21 years of age, appear in the statistics as children. Exactly how many such cases there may be it is of course impossible to say, but the number probably does not greatly exceed 167,000 and most of these women are reported in the older ages of childhood, that is, from 16 to 20 years.¹

RACE.

The following table shows the number of children of the different races and the percentage which the children of each race form of the total number of children at specified ages:

AGE.	CHILDREN ENUMERATED IN CENSUS OF 1910.				
	Total.	White.	Negro.	Indian.	Chinese, Japanese, and all other.
Under 21 years.....	40,417,361	35,315,207	4,941,148	142,547	18,459
Under 20 years.....	38,562,739	33,684,886	4,725,523	136,804	15,526
Under 15 years.....	29,499,136	25,716,495	3,665,107	108,318	9,216
Under 10 years.....	20,391,996	17,798,687	2,509,841	76,925	7,143
Under 5 years.....	10,631,364	9,322,914	1,263,288	40,384	4,778
Under 1 year.....	2,217,342	1,955,605	252,386	8,216	1,135
5 to 9 years.....	9,760,632	8,475,173	1,246,553	36,541	2,365
10 to 14 years.....	9,107,140	7,918,408	1,155,266	31,393	2,073
15 to 19 years.....	9,063,603	7,968,391	1,060,416	28,486	6,310
20 years of age.....	1,854,622	1,630,321	215,625	5,743	2,933
PER CENT WHICH CHILDREN OF SPECIFIED RACE FORM OF ALL CHILDREN OF GIVEN AGE.					
Under 21 years.....	100	87.4	12.2	0.4	(²)
Under 20 years.....	100	87.4	12.3	.4	(²)
Under 15 years.....	100	87.2	12.4	.4	(²)
Under 10 years.....	100	87.3	12.3	.4	(²)
Under 5 years.....	100	87.7	11.9	.4	(²)
Under 1 year.....	100	88.2	11.4	.4	0.1
5 to 9 years.....	100	86.8	12.8	.4	(²)
10 to 14 years.....	100	86.9	12.7	.3	(²)
15 to 19 years.....	100	87.9	11.7	.3	.1
20 years of age.....	100	87.9	11.6	.3	.2

¹ The number 167,000 is arrived at by assuming that at ages 15 to 19 and at age 20 the number of boys to 100 girls is 102.1, just as it is at ages 10 to 14, and that the number of boys reported at 15 to 19 and at 20 is a reasonably true statement.

For a discussion of the evidence which leads to the belief that the excess of females at ages 15 to 20 is due to an understatement of age see "The proportion of the sexes," Supplementary Analysis of the Twelfth Census, p. 101.

² Less than one-tenth of 1 per cent.

Roughly speaking, seven children out of every eight in this country are white. The rest are mostly negroes, for there are only 142,547 Indians and 18,459 Chinese, Japanese, and other colored under 21 years of age. The relative numerical importance of the races is practically the same at all the ages shown in the table, though the percentage which the negroes form of the infants under 1 year of age is peculiarly low. Too much weight should not be attached to this fact, because it is possible that it may result from a less accurate report of babies' ages among that class of the population or from a less complete and thorough enumeration of negro babies.

The number of boys and the number of girls of each race are shown in Table IV:

AGE.	CHILDREN ENUMERATED IN CENSUS OF 1910.				
	Total.	White.	Negro.	Indian.	Chinese, Japanese, and all other.
BOYS.					
Under 21 years.....	20,333,126	17,820,731	2,427,008	72,166	13,221
Under 20 years.....	19,433,754	17,019,263	2,334,511	69,362	10,615
Under 15 years.....	14,906,472	13,020,120	1,826,569	54,750	5,033
Under 10 years.....	10,394,719	9,014,016	1,248,195	38,551	3,657
Under 5 years.....	5,350,596	4,728,650	629,320	20,202	2,424
Under 1 year.....	1,123,409	993,242	125,459	4,127	581
5 to 9 years.....	4,924,123	4,285,366	619,175	18,349	1,233
10 to 14 years.....	4,601,753	4,006,104	578,071	16,199	1,376
15 to 19 years.....	4,527,282	3,999,143	507,945	14,612	5,582
20 years.....	899,372	801,468	92,494	2,804	2,606
GIRLS.					
Under 21 years.....	20,084,235	17,494,476	2,514,140	70,381	5,238
Under 20 years.....	19,128,985	16,665,623	2,391,009	67,442	4,911
Under 15 years.....	14,592,664	12,696,375	1,838,538	53,568	4,183
Under 10 years.....	10,087,277	8,784,071	1,261,346	38,374	3,486
Under 5 years.....	5,250,768	4,594,264	633,968	20,182	2,354
Under 1 year.....	1,093,933	962,363	126,927	4,089	554
5 to 9 years.....	4,836,509	4,189,807	627,378	18,192	1,132
10 to 14 years.....	4,505,387	3,912,304	577,192	15,194	697
15 to 19 years.....	4,536,321	3,969,248	552,471	13,874	728
20 years.....	955,250	828,853	123,131	2,939	327

Except in the case of the negroes, the number of boys exceeds the number of girls at each age period shown in the table. Among the negroes the girls exceed the boys at all ages except 10 to 14. Among the negro babies under 1 year old there were 125,459 boys and 126,927 girls, or 98.8 boys per 100 girls.

NATIVITY AND PARENTAGE.

The nativity and parentage of the white children is given in the following table, which shows the percentage which the children in each class form of the total number of all children, both white and colored:

AGE.	WHITE CHILDREN ENUMERATED IN CENSUS OF 1910.				
	Total.	Native.			Foreign born.
		Total.	Both parents native.	One or both parents foreign born.	
Under 21 years.....	35,315,207	33,623,587	23,792,363	9,831,224	1,691,620
Under 20 years.....	33,684,886	32,251,779	22,820,635	9,431,144	1,433,107
Under 15 years.....	25,716,495	24,957,149	17,731,580	7,225,569	759,346
Under 10 years.....	17,798,087	17,297,071	12,407,297	4,889,774	401,016
Under 5 years.....	9,322,914	9,220,407	6,546,282	2,674,125	102,507
Under 1 year.....	1,955,605	1,948,870	1,369,140	579,730	6,735
5 to 9 years.....	8,475,173	8,176,664	5,861,015	2,315,649	298,509

The number of white children who are themselves foreign born is comparatively small, especially among the young children. Of the total number under 5 years of age only 102,507, or 1 per cent, are foreign-born white. Native white children with one or both parents foreign born; that is, white children born in this country of immigrant parents, or with one parent an immigrant, are numerous, forming in each age group approximately one-fourth of all the children. Most of the children are, however, native white of native parentage; that is, born in the United States of parents who were both born in this country. Children of this class under 15 years of age number 17,731,580 and form 60.1 per cent of all children of that age.

The number of boys and the number of girls in each of these classes of white children is given in the following table:

AGE.	WHITE CHILDREN ENUMERATED IN CENSUS OF 1910.				
	Total.	Native.			Foreign born.
		Total.	Both parents native.	One or both parents foreign born.

20 years.....	828,853	711,662	502,892	208,770	117,191

The excess of males over females, previously noted, is common to all classes of white children except the native whites with one or both parents foreign born in the age periods 15 to 19. At that age the figures show 1,094,861 native white boys of foreign or mixed parentage as contrasted with 1,110,714 girls of that class. This apparent excess of females may not be a true statement of the facts but may possibly result from the understatement of ages on the part of a considerable number of women who in fact belong in the older age group.¹

GEOGRAPHIC DISTRIBUTION.

The percentage which the children in each geographic division form of the total number in the country as a whole is shown on the following page for those under 15 years of age. The composition of the different geographic divisions is given in the tables on pages 20 to 49, where the States are arranged geographically.

Almost all the figures presented in the general tables are given for each State as well as for the United States as a whole. In grouping the States in geographic divisions the Children's Bureau has used the form followed by the Bureau of the Census, from whose reports

¹ For a discussion of the understatement of age, see p. 11.

the basic figures have been taken. Because of the large number of States it is extremely difficult to exhibit the broad geographic conditions regarding population by means of comparisons among individual States. In addition, therefore, to the presentation of statistics by States they are given for nine groups of States which are designated as geographic divisions. The reasons for thus grouping the States is explained by the Bureau of the Census as follows: ¹

"This plan reduces the comparisons necessary to a general understanding of the geographic differences in conditions to a number which can be readily grasped. The States within each of these divisions are for the most part fairly homogeneous in physical characteristics, as well as in the characteristics of their population and their economic and social conditions, while on the other hand each division differs more or less sharply from most others in these respects. In forming these groups of States the lines have been based partly on physical and partly on historical conditions.

The grouping of these States in geographic divisions has facilitated a geographical rather than an alphabetical order in the tables which present the results for individual States. The advantage of this geographical order lies in the greater ease with which conditions in contiguous States can be compared."

TABLE VII

CHILDREN UNDER 15 YEARS OF AGE, CENSUS OF 1910: PER CENT WHICH THOSE IN GIVEN GEOGRAPHIC DIVISION FORM OF THE TOTAL NUMBER IN THE UNITED STATES.

GEOGRAPHIC DIVISION.	Total.	Native white.			Foreign-born white.	Negro.
		Total.	Both parents native.	One or both parents foreign born.		
The United States.....	100.0	100.0	100.0	100.0	100.0	100.0
New England.....	6.0	6.9	4.0	13.2	14.7	0.4
Middle Atlantic.....	19.0	21.4	15.6	33.4	42.4	2.6
East North Central.....	18.3	20.7	19.3	24.1	19.3	1.9
West North Central.....	12.6	14.1	13.8	15.6	8.3	1.6
South Atlantic.....	15.5	11.4	15.6	2.0	2.4	44.7
East South Central.....	10.9	8.5	12.0	.7	.5	27.6
West South Central.....	11.5	10.1	13.2	3.2	4.4	20.8
Mountain.....	2.8	3.1	3.0	3.1	3.1	.1
Pacific.....	3.5	3.9	3.4	4.8	4.9	.1

This table brings out the great differences in the geographic distribution of the several classes of children under 15. The negro children are located almost exclusively in the South and Southwest, 44.7 per cent being in the South Atlantic division, 27.6 in the East South Central, and 20.8 per cent in the West South Central. These three divisions contain 93.1 per cent of all the negro children in the country.

¹ "Abstract of the Thirteenth Census of the United States," 1910, p. 14.

The foreign-born white children and the native white children of foreign or mixed parentage, on the other hand, are located mainly in the New England, Middle Atlantic, and North Central States. Of the foreign-born white children under 15, 42.4 per cent are in the Middle Atlantic States, 19.3 per cent in the East North Central, 14.7 in New England, and 8.3 in the West North Central, making a total for these four divisions of 84.7 per cent of all foreign-born white children. Of the native white of foreign parentage these divisions contain 86.3 per cent. The native white children of native parentage are much more evenly distributed. The highest percentage found in any one division is 19.3 in the East North Central and the lowest, 3, in the sparsely settled Mountain States.

The figures mean, of course, that the composition of the child population is very different in the different sections of the country. The following table shows the percentage which the children of each class make up of all the children in each geographic division:

GEOGRAPHIC DIVISION.	CHILDREN UNDER 15 YEARS OF AGE, CENSUS OF 1910; PER CENT OF THE TOTAL NUMBER IN THE SPECIFIED DIVISION FORMED BY—					
	Native white.			Foreign born white.	Negro.	All other.
	Total.	Both parents native.	One or both parents foreign born.			
The United States.....	84.6	60.1	24.5	2.6	12.4	0.4
New England.....	92.8	39.3	53.5	6.2	0.9	(¹)
Middle Atlantic.....	92.5	49.3	43.2	5.8	1.7	(¹)
East North Central.....	95.9	63.5	32.4	2.7	1.3	0.1
West North Central.....	96.3	66.0	30.3	1.7	1.6	.4
South Atlantic.....	63.7	60.6	3.1	.4	35.8	.1
East South Central.....	68.2	66.7	1.5	.1	31.6	(¹)
West South Central.....	75.5	68.8	6.7	1.0	22.4	1.1
Mountain.....	92.9	65.4	27.5	2.9	.5	3.7
Pacific.....	93.9	60.1	33.9	3.6	.5	1.9

¹ Less than one-tenth of 1 per cent.

Native white children with both parents born in this country constitute more than half the child population under 15 years of age in all sections of the country except New England and the Middle Atlantic States; and in the Middle Atlantic States they just miss forming half. In New England only two children out of five (39.3 per cent) are native whites of native parentage, and a majority (53.5 per cent) are native whites with one or both parents foreign born. Almost three children out of every five in New England were either themselves born in a foreign country or had one or both parents who were born in a foreign country. In no other section of the country is the percentage formed by the children of foreign birth or parentage so high.

In the South Atlantic and the East and West South Central divisions the children of foreign birth or foreign or mixed parentage form only a very small percentage of the total number of children. In these divisions the negro children are numerous, the percentage which they form of all children in the division being 35.8 for the South Atlantic, 31.6 for the East South Central, and 22.4 for the West South Central.

STATE DISTRIBUTION.

The rank of the different States according to the absolute number of children under 15 years of age is shown in the following tabular statement:

STATE.	CHILDREN UNDER 15 YEARS OF AGE.		STATE.	CHILDREN UNDER 15 YEARS OF AGE.	
	Number.	Rank of State.		Number.	Rank of State.

Virginia.....	762,878	15	New Mexico.....	120,719	40
Wisconsin.....	750,203	16	New Hampshire.....	112,725	41
New Jersey.....	737,916	17	Idaho.....	108,478	42
Mississippi.....	723,848	18	Montana.....	102,188	43
Iowa.....	687,062	19	Vermont.....	98,279	44
Minnesota.....	661,475	20	District of Columbia.....	76,630	45
Oklahoma.....	645,748	21	Arizona.....	64,786	46
Louisiana.....	636,603	22	Delaware.....	58,550	47
South Carolina.....	629,645	23	Wyoming.....	39,209	48
Arkansas.....	620,241	24	Nevada.....	16,989	49
California.....	543,796	25			

New York stands first with 2,488,621 children under 15 and Pennsylvania second, with almost as many, 2,368,926. The other States having over 1,000,000 children of this age, ranking in the order named, are Illinois, Texas, Ohio, Georgia, and Mississippi. The smallest number of children is reported by Nevada, 16,989, and the next smallest by Wyoming, 39,209.

SIZE OF COMMUNITIES.

In Tables 31 to 33, page 50, the children are divided into four classes according to the size of the communities in which they live; whether cities of 100,000 inhabitants or over, cities of from

25,000 to 100,000, places of from 2,500 to 25,000, or rural districts. These figures are given for geographic divisions with the percentage which the children in each class of communities form of the total number in the specified division.

In the United States as a whole there are almost five-and-a-half million children under 15 growing up in the cities of 100,000 inhabitants or over. Not quite one child in five lives in a big city. In the Middle Atlantic States the proportion is more than two in five (43.4 per cent); in the Pacific States more than one in four (28.2 per cent), and in New England and the East North Central States a little less than one in four (24.5 per cent and 23.7 per cent, respectively).

The great body of children under 15 are, however, still to be found in the distinctly rural districts and in the communities of less than 2,500 inhabitants. The total number of children in rural communities of less than 2,500 inhabitants is 17,897,520, which is 60.7 per cent of the total number in the country. The lowest percentage of country children is found in New England (16.6) and the highest (86.4 per cent) in the East South Central States. The percentage is very high in all the Southern States.

The children in cities having 25,000 or over are shown in Tables 34 to 39, classified by sex, race, and nativity.
